

Warranty for quartz glass products, submersion lamps and submersion tube systems

Any warranty of uv-technik Speziallampen GmbH assumes the intended use of the products in accordance with the current valid operating instructions. The proper treatment and installation is fundamental for this. In particular, this requires the mechanical tension-free installation of quartz glass parts as well as the protection of plastic parts in the environment as well as of supply cables from the UV radiation of the lamps. The provision for intended use is explained in the operating instructions, which can be found at www.uvtechnik.com.

If used as intended, defective products will be repaired or replaced free of charge by uv-technik Speziallampen GmbH within 6 months from the date of delivery. The basis for determining the delivery date is the delivery note.

The warranty is void if changes have been made to the product or in case of installation errors. Glass breakage is generally not covered by the warranty.

In addition, the terms and conditions of uv-technik Speziallampen GmbH apply.
